The **Razer DeathStalker Gaming Keyboard** is a gaming-grade keyboard featuring chiclet style key caps, green LED backlit keys and 1000Hz Ultrapolling. Keys are fully programmable, with on-the-fly macro recording. There is a dedicated gaming mode, which disables the Windows key by default so as not to interfere with your gameplay in case you accidentally hit it. The Deathstalker features anti-ghosting technology, allowing you to press up to ten simultaneous key presses and have them accurately reported in your game. The cable of the keyboard is braided for long-term durability. For ergonomic comfort, the keyboard features a fixed wrist rest.
