PIXELS

## BUILT-IN WI-FI, 3/4-MILE RANGE

Linking your mobile device to your Phantom through the DJI GO app is easy with an enhanced Wi-Fi range extender that's built right into the remote controller. A high-powered 5.8GHz transmission frequency keeps the Phantom responsive, even when flying at distances of up to 0.75mi (1.2km) away.\*

\*Maximum flight distance may vary with environmental conditions and local regulations.

connection

## 3-AXIS STABILIZATION GIMBAL

With DJI's industry-standard gimbal stabilization technology, your camera is held perfectly stable no matter how you fly. This 3-axis gimbal makes complex shots and hovering for long exposure photos easy.

## EASY TO FLY

Your Phantom 3 4K fits into your life and makes flying remarkably intuitive and easy. From takeoff to landing, it's completely under your control, responding to your commands while automatically handling the most complex aspects of safe, stable flight.

# SAFETY FEATURES

## Unparalleled Safety for First-Time Pilots

A unique Beginner Mode helps you learn how to fly in a safe, limited area. Your Phantom 3 4K can be set to fly only within a given distance and altitude from you, protecting your Phantom and making it automatically stay inside your desired limits.

# WORRY-FREE AUTOPILOT

Automatic elements of your Phantom 3 4K's intelligent flight system help you fly and are available at the touch of a button.

## AUTO-TAKEOFF

With one tap in the DJI GO app, your Phantom 3 will turn on its motors and rise to a pre-set height. It will then hover perfectly in place until you direct it where to go.

---

## AUTO-RETURN HOME

When GPS is available, your Phantom 3 remembers the exact spot that it took off from. Wherever your aircraft is flying, tap a button to have it return right back home.

---

## FAILSAFE

If the Intelligent Flight Battery is running low, or if your Phantom 3 loses the connection with your remote controller for any reason, the aircraft will automatically return to the takeoff point and land safely.

## VISION POSITIONING FOR INDOOR FLIGHT

Fly indoors, low to the ground, and in GPS-free areas with Vision Positioning technology. Visual and ultrasonic sensors scan the ground beneath your Phantom 3 4K for patterns, enabling it to identify its position and move accurately.

## POWERFUL MOBILE APP

Complete power is at your fingertips. Control the camera and change flight settings, all from your mobile device. Plus:

- Compatible With Most DJI Products
- Instant Video Downloading
- Easy Video Editor
- Comprehensive Media Library
- Sharing and Connecting Creativity
- Live Map and Radar
- Detailed Records and Achievements
- Manage Your DJI Account

## MORE FLYING, MORE FUN

Fly for up to 25 minutes on a single charge. The patented DJI Intelligent Flight Battery continuously tells you exactly how long you can continue flying, based on how far and at what altitude you are, and it alerts you when it's time to head back. This information is streamed live to the GO app on your mobile device.

Recharging is quick and easy, and bright LED indicators tell you current status and power level. A protective plastic housing helps prevent damage and contains intelligent sensors that make your battery worry-free while extending the life of your battery.
