

9450 Carbon Fiber Reinforced Self-tightening Propellers

This is a set of two 9-inch 9450 Carbon Fiber Reinforced Propellers, one clockwise (CW) propeller and one counter-clockwise (CCW) propeller, both black with yellow stripes.

Optimized to be aerodynamic and lightweight, they enable even greater thrust than the previous 9443 models.

Perfect balance is ensured by high-precision manufacturing and a strict quality control system. Composite hubs attach more firmly to your motors, which improve reliability with DJI's self-tightening system.

Compatible with Phantom 3/Phantom 2 series or Flame Wheel series platforms with the E310/E305/E300 tuned propulsion systems.

Weight: 13g (single); Diameter and screw pitch: 24 x 12.7cm

- High quality carbon fiber material for extra durability
- Aerodynamic for high performance
- Professional design
- Easy to install
- Superior balance
- Lightweight and practical
- Helps reduce vibrations or other unwanted effects
