

Lite-On ETAU208-96 Slim External DVD Writer

Lite-On proudly announces a new generation of external slim DVD writers. The Lite-On ETAU208-96 Slim External DVD Writer is a full featured, USB-powered, 8X slim DVD writer. It's ideal for anyone seeking a compact, stylish and portable DVD writer.

Mobility is an important aspect of the eSAU208. The drive can be powered through a USB connection instead of a traditional power adapter, so the mobile doesn't have to rely on a power socket to operate the Lite-On ETAU208-96 Slim External DVD Writer. The drive will harvest its power directly from the notebook through a convenient USB cable.

Writing speeds of the eSAU208 are 8X for DVD±R, 6X for DVD±R DL and DVD-RW, 5X for DVD-RAM and 24X for CD-R(W). Reading speeds are 8X for DVD-ROM and 24X for CD-ROM. For some notebooks where lower energy consumption is required, the Lite-On ETAU208-96 Slim External DVD Writer provides a "power saving mode". Writing and reading speeds will be reduced by 40-60%, depending on the media format, in order to operate swiftly on these specific low powered notebooks.

Specifications
