

Sound you can see

Enter the VOID—the innovative family of advanced gaming headsets from Corsair. Whether you choose wireless, USB, or stereo powered audio gear, you will always be one step ahead of your enemies.

With fast forward design, spectacular fidelity, and innovative features like InfoMic and CUE Control, Corsair VOID gaming headsets enable you to command and control your gaming soundscape without hitting pause.

Convenient USB interface

You'll be ready to go with easy one-cable connection.

Don't pause for sound. See it with InfoMic and CUE Control.

InfoMic brings critical information to the end of your microphone, enabling an instant "heads up" for everything you need to know about in-game audio: EQ settings, Dolby, microphone mute status, and battery life – all visually communicated via the LED indicators next to the microphone.

CUE Control enables rapid re-spec of your audio settings on the fly. The digital dial and push button combo allows quick volume changes and EQ preset swaps, and toggles Dolby 7.1 on or off, all with a single control.

Unrivaled Comfort

Your ears aren't round, so why buy a headset with round earcups? Our "True Form" shape fits your ears like a glove... for your ears. And when it's time to embark on marathon gaming sessions, the microfiber-wrapped memory foam ear pads enable extended play.

RGB Lighting under your command with CUE software

Express yourself with 16.8 million color options to match your gear and your individual style. LEDs in each ear cup have fully adjustable power, pattern and color to provide anything from subtle and restrained, to eye-grabbing intensity.

The CUE (Corsair Utility Engine) enables all this, and more. And with CUE Link, your Corsair RGB gaming gear can all work in harmony, whether it's simply synchronizing your colors, or selecting wave and ripple effects that extend across your keyboard, mouse, and headset.

Epic immersion and true multi-channel audio

Efficient 50mm neodymium drivers create staggering bass, scintillating highs, and towering dynamic range, and genuine Dolby 7.1 surround delivers lethally accurate positional audio.

Noise cancelling microphone

If you're a team player, you need crystal clear voice communication. The noise-cancelling microphone puts your voice in the spotlight – and nothing else.

Contents and Specifications

Package contents

- VOID USB Dolby 7.1 Gaming Headset
- Quick Start Guide

Compatibility

- PC with USB port Windows 8, Windows 7, or Windows Vista
- Internet connection (for CUE software download)

Technical specifications

- Headphones
 - Type: Dolby Headphone 7.1 positional audio
 - Frequency Response: 20Hz to 20kHz
 - Impedance: 32 Ohms @ 1kHz
 - Sensitivity: 107dB (+/-3dB)
 - Drivers: 50mm
 - Connector: USB Type A

- Microphone
 - Type: Unidirectional noise-cancelling condenser with adjustable, rotating boom and infoMic lighting
 - Impedance: 2.2k Ohms
 - Frequency Response: 100Hz to 10kHz
 - Sensitivity: -38dB (+/-3dB)
